Maria Moszyńska

Spis publikacji

1. A generalization of the Gauss-Bonnet formula, Bull. PAS 7(1959),601-609.

2. Generalization of the Theory of Retracts on the pairs of spaces, Bull. PAS 13(1965), 13-19.

3. On the homotopy type of a quotient space, Bull. PAS 15(1967), 449-453.

4. On the splitting of spaces, Bull. PAS 16(1968), 3-8.

5. On the homotopy classification of spaces, Fund. Math. 66(1969), 65-83.

6. ANR-spaces which are deformation retracts of some polyhedra, Fund. Math. 66(1970), 203-214.

7. On shape and fundamental deformation retracts I, Fund. Math. 75(1972), 145-167.

8. On shape and fundamental deformation retracts II, Fund. Math. 77(1972), 235-240.

9. Uniformly movable compact spaces and their algebraic properties, Fund. Math. 77(1972), 125-144.

10. Various approaches to the fundamental groups, Fund. Math. 78(1973), 107-118.

11. The Whitehead Theorem in the theory of shapes, Fund. Math. 80(1973), 221-263.

12. The Fox Theorem and the Whitehead Theorem in the theory of shapes, Coll. Math. Soc. Janos Bolyaii 8, Topics in Topology, Keszthely 1972.

13. Concerning the Whitehead Theorem for movable compacta, Fund. Math. 92(1976), 43-55.

14. Theory of equidistance and betweenness relations in regular metric spaces, Fund. Math. 96(1977), 17-29.

15. The Whitehead Theorem for uniformly movable topological spaces, Bull. PAS 23(9)(1975), 993-996.

16. Concerning the shape groups of compact metric spaces, Fund. Math. 99(1978), 15-34.

17. (wsp. z A. Gmurczyk), On 1-bouquets of 2-polyhedra, Bull.PAS 28(1980),185-192.

18. (wsp. z M. Kordosem i L. Szczerbą), Wanda Szmielew (1918-1976), Roczniki PTM, Seria II: Wiadomości Matematyczne 21(1978), 25-28.

19. Karol Borsuk (1905-1982), Nauka Polska 3(1984), 213-216.

20. (wsp. z E. Pleszczyńską), Equivalence relations for statistical spaces, Math. Operationsforschung und Statistic, 13(1982), 193-218.

21. (wsp. z T. Bromkiem), Various categorical approaches to statistical spaces, Diss. Math. 224(1983), 1-32.

22. Products of statistical spaces, Math. Operationsforschung und Statistic 16(1985), 407-418.

23. (wsp. z T. Bromkiem i K. Prażmowskim), Concerning basic notions of the measurement theory, Czech. Math. J. 34(109)(1984), 570-587.

24. On iterated 1-bouquets of 2-manifolds, Glasnik Mat. 22(42)(1987), 421-427.

25. (wsp. z J. Święcicką), Geometria z Algebrą Liniową, PWN, 1987.

26. (wsp. z I. Herburt), On intrinsic embeddings, Glasnik Mat. 22(42)(1987), 421-427.

27. On rigid subsets of some manifolds, Coll. Math. 57(1989), 247-254.

28. (wsp. z I. Herburt), On metric products, Coll. Math. 62(1991), 121-133.

29. On metric inverse limits, J. LMS (2)42(1990), 160-174.

30. On the uniqueness problem for metric products, Glasnik Mat. 27(47)(1992), 145-158.

31. Lipschitz inverse and direct sequences, Top. Appl. 56(1994), 259-275.

32. (wsp. z I. Herburt i K.Rudnikiem), On intrinsic invariance of fractal dimensions, Geom. Ded. 57(1995), 1-10.

33. (wsp. z I. Herburt i K. Rudnikiem), Spaces with intrinsically invariant fractal dimensions, Glasnik Mat. 30(50)(1995), 193-207.

34. (wsp. z T. Żukowskim, Duality of convex bodies, Geom. Ded. 58(1995), 161-173.

35. Remarks on the minimal rings of convex bodies, Studia Sci. Math. Hung. 35(1999), 155-174.

36. (wsp. z K. Przes/l awskim), Santaló points associated with radial densities, Rend. Circ. Mat. Palermo, Serie II, Suppl. 50(1997), 273-288.

37. (wsp. z T. Żukowskim), On G-pseudo-centres of convex bodies, Glasnik Mat. 33(53)(1998), 251-265.

38. Quotient star bodies, intersection bodies, and star duality, J.Math. An. Appl. 232(1999), 45-60.

39. Looking for selectors of star bodies, Geom. Ded. 83(2000), 131-147.

40. Geometria zbiorów wypukłych - zagadnienia wybrane, WNT, 2001.

41. (wsp. z T. Żukowskim), On G-pseudo-centres of convex bodies II, Rend. Circ. Math. Palermo, Serie II, Suppl. 70(2002), 177-190.

42. On directly additive selectors for convex and star bodies, Glasnik Mat. 39(59)(2004), 145-154.

43. O geometrii zbiorów wypukłych, Mat. Stos. 5(46)(2004).

44. (wsp. z I. Herburt i Z. Peradzyński), Remarks on radial centres of convex bodies, Math. Ph., An. Geom., 8(2005), 157-172.

45. Selected topics in convex geometry, Birkhäuser, 2006.
