Calling all code-breakers and puzzle solvers: together, we secure the future of the firm and our clients.

Join us for the second edition of Ethical Hacking workshop and take the first step towards career in Cybersecurity!

Goldman Sachs invites students and graduates for the online Ethical Hacking interactive workshop with Immersive Labs. During this week-long challenge, you will:

- Learn exploitation techniques used by security researchers and white hats
- Discover how application owners can defend against those attacks
- Take on a variety levels of challenges leveraging Goldman Sachs Immersive Labs interactive platform
- Practice and execute many exploitation techniques used in everyday life of a penetration tester including SQL Injection, Cross Site Scripting, Remote Code Execution and many others
- Experience firsthand what it means to own a computer system through successful exploitation of vulnerabilities

**Workshop details**

**Monday, 15 March 2021 - Friday, 19 March 2021**

- Workshop will begin with 1.5-hour introduction meeting on Monday, when you will have an opportunity to network and learn from leading security experts in the industry and get first-hand input on what it’s like to be a pentester at Goldman Sachs
- You will then get free access to Immerisve Labs platform to complete a number of challenges and compete with others until Friday

Sign up by 10 March and have a chance to win headphones, speakers and e-book readers!

Make things possible.
