

geosurvey collect

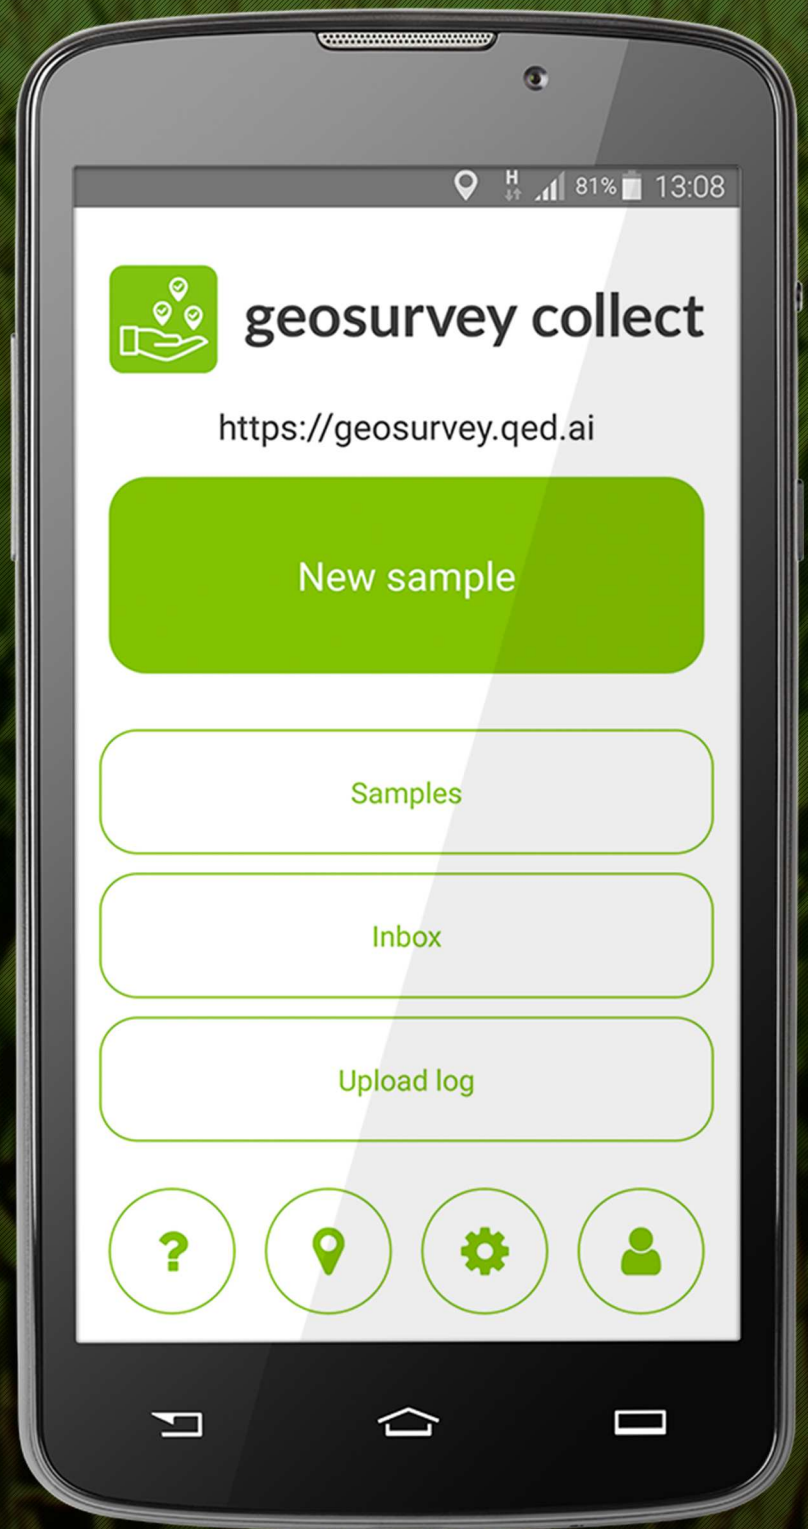

Collect Better Data. Fast!

Capture geospatial data in the field, such as photos and surveys, and easily scale the processing of this data through private or public crowds.

Team: Tomasz Kępa, Tomasz Knopik, Anna Prochowska, Mateusz Śmiech
Advisor: Krzysztof Ciebiera

Mobile Feedback

Connect field agents with remote experts in a bidirectional feedback loop that is robust to network outages and capable of handling payments.

Region Specific Surveys

Control *where* and *how* data is collected. See what field agents see. Generate maps updated in real-time as data streams in, and build predictive models.

DIAGNOSE

Diagnose plant diseases and nutrient deficiencies via remote agronomic experts.

REGISTER

Register new patients for relief programs, with verifications handled remotely.

LEARN

Learn what locals think of something you see in a foreign place, but cannot understand.
