

Ph.D. in Reinforcement Learning

A Ph.D. position in reinforcement learning

We offer a Ph.D. student position in projects in artificial intelligence and reinforcement learning. The projects are funded by two NCN grants led by Piotr Miłoś.

We offer:

- ▶ work on interesting, cutting-edge problems in machine learning
- ▶ collaboration in a vibrant team with international connections
- ▶ attractive salary: 5000PLN
- ▶ budget for travel

Our group, AWARElab, concentrates on reinforcement learning, which is a power-horse in many recent breakthroughs in AI research. We develop planning and model-based RL

algorithms, which may empower an agent to make intelligent decisions in complex environments.

A prospective student should have:

- ▶ strong programming skills (especially in python)
- ▶ solid background in mathematics (with emphasis on probability theory)
- ▶ fluent knowledge of English
- ▶ experience in machine learning and previous research projects will be a significant plus

To apply send email at: pmilos@mimuw.edu.pl including CV, a list of grades and short motivation letter.

Application deadline: 20th June 2020

Starting date: Oct 2020
